

GRADUATE STUDY IN SPAIN

**EARN A DOUBLE
ECE MASTERS IN MADRID,
NO SPANISH REQUIRED**

Earn a dual M.S. in Electrical and Computer Engineering and in Telecommunications or Multimedia from UNM and Universidad Carlos III de Madrid.

UNM students wanting to obtain a Master in Telecommunications must pass 30 credit hours corresponding to one of the ECE paths, and then spend a year in Spain at UC3M, taking specific classes taught in English, and completing their Masters' thesis.

This is an opportunity for UNM students to obtain an additional M.S. valid in Europe, and to get immersed in the culture and language of Spain.

Contact Manel Martínez-Ramón or Ramiro Jordán for more information.
